Updated: 06/30/2020 By Computer Hope, the Mac vs. PC debate is one of the most controversial topics about computers. This page provides a general comparison between computers running Apple's macOS and those running Microsoft Windows. We are looking to help interested users â€” to buy a new computer, not to dictate which brand is "best". Mac - Traditionally, Macs have fewer security vulnerabilities. Also, overall, Macs get fewer viruses than PCs running Windows. However, these numbers can be misleading, as Apple computers only represent less than 10% of the market share. Consequently, the PCs show that they have vulnerabilities, but if someone was trying to infect or illegally access the biggest number of computers, PCs are the best target. PC - More people today are using computers by performing some versions of Microsoft Windows, which it does A smarter target for strikers. That said, Windows computers had more security vulnerabilities than Apple computers in the past. Result: Mac wins in this category. Although more recent versions of Windows have made significant improvements in security, most malware is created for PCs. Therefore, it is less probable that you have insurance problems with a MAC. MAC - Although many people may argue that "you receive what they pay," compared to a PC, a Mac computer and its peripheral, it is much more expensive from the point of view of the cost to the performance. That said, the good quality -made Mac computers with high quality components, while some computers are not being. PC - Many PCs, including their periods, are much less expensive than a Mac. They are especially cheaper when customizing computer components. Result: PC gets this category by comparing all computers and hardware. If you compare only advanced hardware, a PC can be almost expensive in some cases. Operating System Compare the operating system is how to compare mothers and oranges. Both macos and Windows 10 are clean, rapid and highly capable operating systems. In this category, it is a personal preference and specific needs of the enjoyment. Result: tie, as it depends on the preferences of the usual. What is the most popular operating system? Note Windows is placed on PCs by manufacturers, most of which adds some form of bloatware. But it is removable and does not mean that Windows 10 is a lower operating system. However, an Apple usual never had to deal with bloatware. Tip MAC uses can use Boot Camp to run Windows on your MAC. PC usuals can also install Linux on their computers and use it in conjunction with Windows or as an alternative to Windows. Software the number of software forms for MAC over the years. However, Windows dominates the computer software market, especially with games. The developers are more likely to create PC software due to their much larger user base. larger. There are hundreds of free programs available for PC that is not available for MAC. Conclusion: The PC gets this category in the general availability of free software and programs. However, remember that most larger popular applications, such as Microsoft Office and Adobe Products (eg Photoshop) products, are available for PC and MAC. Ecosystem Mac - Apple has created a strong ecosystem with Apple products such as iPhone, iPad and Apple TV. Buying an Apple computer helps interact with other Apple products more easily using macos. PC - Microsoft has a strong ecosystem with Microsoft Office and Xbox. However, they are not more motivatable and must rely on Android devices. In addition, as there are so many different manufacturers, your ecosystem is not being cohesive as that of Apple. Conclusion: Mac wins this category for those who already have Apple products. Build Mac Quality - Macintosh computers are known for their exceptional quality throughout their line, including laptops and desktops. Macs offer a very compact profile, regardless of the aesthetically pleasant form and form. Note that although Apple is known for its quality, many examples in which Apple has made mistakes. For example, recent Apple MacBooks had a lot of problems with their keyboards. PC - PCs have always been highly customizable, from cases to internal components. As such, there are many different construction quality. Therefore, although you can get high quality components for a PC, you can also get those of low quality. Conclusion: Mac wins this category - but situationally. Although the quality of the components of the PC may be so high as a majority, we are comparing the overall quality of all PCs. Customization and MAC updates - Apple computers can be customized with vain options. All your computers pre-built and are manufactured only by Apple. PC - PCs have more pre-built options due to a larger number of manufacturers, manufacturers, wen fo sdinamed eht desce dna teen nac yeti .jdrac scilpary tsetal .g.e| snoitpo edargpu erom evah sCP polkse dliub-motsuc esuaceb .yllanoitiddA .metsys gnitarepo taht rof semag etaerc ot ylekil erom raf era srepoleved .hcus sa dna .erahs tekram eht fo %09 snwo swodniW .revewoH .scaM rof troppus desacernci nwohs evah seinapmoc emag retupmoc .sray eht roV0 gnimaC .revird retupmoc a etadpu dna latsni ot wOH .yrogetac siht sniw caM .enil mottoB .etad-ot-pu niamer srevidl la erus ekam ot luiciffid eb nac ti .srrutcafuanm erawdrah tneroffid ynam os era eroht esuaceb .osA .srevird esobt niatnam ot rerutcafuanm erawdrah eht rof dna srevid seruqer llihs erawdrah lla .erawdrah llatnsi ot reisiae ti edam sah yalp dna gulp hguhtlA .srevird suoremun seriuqer hcihw .stnenopmoc elbaegnabrcetni htiw srrutcafuanm tnerreffid ynam yb tliub era sCP - CP .srevird rieht fo tsom niatnam dna lortnoc nac elppA .ylneugesnoC .erawdrah eht fo tsom dna sretupmoc eseht fo rerutcafuanm elos eht si elppA esuaceb egatnavda na sah caM - caM srevidR .wols strats retupmoc swodniW ym fi od ot tahW .emit toob eht sesaerced ro sesaernci taht erawdrah rewols ro retsaf htiw tliub eb nac CP a .revewoH .erawdrah ralimis dna smetsys gnitarepo tsetal eht htiw CP dna caM a gnirapmoc nehv eIT .enil mottoB .snoitpo retsaf hcum evah sCP dliub ohw esobt tub .meht ot elbalava sDSS evah sCP dna scaM htoB .sesu retupmoc a evird drah fo epyt eht si emit toob gnicuder ni tnenopmoc tseggib elgnis eht .erawdrah ralimis htiw sretupmoc gnirapmoc nehv elbigilgen era scenereffid eseht .dias gnieb taht .SOcam naht retsaf smrofreP 01 swodniW .sesac emos ni .yllacitamard desacerced evah semit toob CP ,01 swodniW fo esaeler eht htiw .revewoH .sCP naht pu toob ot retsaf erew scaM .yllanoitidarT .enil mottoB emit toob ?retupmoc wen a yub ro edargpu I dluohS ?otpal a ni edargpu I nac tahW .yrogetac siht sniw CP .enil mottoB .rehgih yllaitnenopxe era noitazimotsuc rof snoitpo eht .retupmoc a dliub ot tnaw ohw esobt rof without having to replace the computer. Result: PC wins this category. Mac support - When you need technical support or help with your Mac, Apple can offer a lot of assistance that is not available for PCs. Because Apple designs and builds its computers, you only need to deal with Apple when you have a problem. In addition, Apple has many stores around the world that offer in-person support and help with using Apple products. PC - If you purchase an OEM PC (e.g. Dell or HP), support can be a hit or miss depending on the OEM and the type of problem you are experiencing. Also, although there are many repair shops that fix computer problems, they are not specialized for one brand of computer and do not offer training. Finally, if you build your own computer, you will deal with many different manufacturers for support. Outcome: Mac wins this category Mac repair costs - Apple strives to make its Mac product line as sleek and compact as possible. To this end, they continue to integrate their components. So when computers need to be repaired, it becomes more expensive. Apple also makes it very difficult for anyone but them to repair their products. While this helps ensure that repairs are done correctly, it can also increase costs and make it more difficult to fix the computer. PC - Desktop PC repairs can be done by any local computer repair shop. However, some PC notebook repairs can be just as expensive and difficult as an Apple notebook. Result: PC wins this category. Touch capability With desktop and notebook computers (not mobile devices), the Mac does not offer touch-screen capability, only the Touch Bar on some MacBooks. Result: PC wins this category. Additional disclaimers Not all PCs are the same There are many PC manufacturers and thousands of PC models Which means that not everything mentioned above applies to all PCs. My Apple can run Windows Microsoft Windows can be performed on Apple computers using Boot Camp, which means not all above Apply to your Mac. In the case of games, sometimes you can run the latest games on your Mac using Boot Camp. However, boot camp is not perfect and that does not mean that all games can be run on your computer, as PC games are not developed with Apple's hardware in mind. Therefore, it is also very possible to find problems and have performance problems. Are Apple computers good with games? Windows XP is not Windows 7, Windows 8 or Windows 10 XP is over 18 years old. Compare a Windows XP computer with a new IMAC with MacOS is how to compare a Ford Pinto with a Ferrari. When deciding between any computer, compare the latest models with similar hardware components. Some people don't like Windows or macos for many people, this can be summed up to the computer operating system. Some users don't like Apple macos or Microsoft Windows. If you are more familiar with one of these operating systems, this may be the most important factor. If you don't like to use macos, get a pc. If you don't like to use Microsoft Windows, get a Mac. I can not decide on what type of computer finally arrive, if you are still having difficulty deciding which type of computer to buy, use the following link to guide it in your purchase decision. What kind of computer should I buy? Purchase?
